The student group supports international students at the University of Konstanz and organizes meetings and helps with any kind of problems.

German high school: Student Mentoring and tutoring
2012 - 2016

PROFILE

As a student at the faculty of Mechanical Engineering, I am always eager to learn new things and gain new experiences. Thereby my interests lie in research and development.

My personal interests are determined by a sporty and ecological lifestyle. Furthermore, my hobbies include working on small technical projects, such as the independent learning of programming languages for web development and electrical engineering projects with the microcontroller Arduino.
